Thank you for your interest in Trauma Training FX, Inc. (T²). We proudly present an overview of our corporate capabilities and invite you to learn more about our company by visiting www.T2Training.com.

Trauma Training FX (T²) is a Service-Disabled Veteran-Owned Business founded in 2006 by Fred and Julie Kolberg to provide high-quality medical training. T² provides life-saving training to federal, state and local government agencies across the United States of America. We provide customized services and products for each of our clients.

Our company has a superior commitment to meaningful services and delivers far more than the client's perceived needs. The commitment to our customer is to provide the highest quality of training in the most cost-effective manner.

Our distinguished capabilities include the following:

- Outstanding past performance ratings
- Consistent cost savings for clients
- Superior record of on-time deliveries
- High staff continuity on contracts
- Excellent financial stability and credit
- Consistent on-time payments to vendors
- Proven success as both a Sole Source Provider and a Subcontractor

EXPERTISE

T² provides First Responder training using the guidelines from the American Safety and Health Institute, Army Combat Lifesaver and Tactical Combat Casualty Care (TCCC), using the guidelines of the Pre-hospital Trauma Life Support (PHTLS) 7th Edition.

CERTIFICATION

T² is a nationally certified TCCC provider with the National Registry Emergency Medical Technicians (NREMT). Students who complete T²'s TCCC course are nationally certified and received 16 CEUs. T²FX is also an American Safety and Health Institute Advanced Training Center (ASHI), operating as the Virginia Beach Training Center. T² can provide certification for its customers as First Responders once they have completed the training course.

FLEXIBILITY

T² provides on-site training as well as training near their headquarters in Virginia Beach. A mobile training team stands ready to implement training wherever the client requires. Our flexibility enables us to act on short notice, offer responsive solutions produce high-quality training and deliver services on time and within budget.

T² provides the following medical training:

- TCCC
- CLS
- Advance TCCC
- ASHI First Responder
- CPR & AED Certification
- Basic First Aid
- Emergency First Responder
- Advance Cardiac Life Support

QUALITY

T² provides First Responder training using the guidelines from the American Safety and Health Institute, Army Combat Lifesaver and Tactical Combat Casualty Care (TCCC), using the guidelines of the Pre-hospital Trauma Life Support (PHTLS) 7th Edition.

Our clients deserve and expect superior training. Our curriculum is thoroughly and consistently updated with the latest updates from the Board of Tactical Combat Casualty Care (TCCC). These updates are implemented immediately to ensure students receive the most proven medical training.

INSTRUCTORS

Our instructors are former special operation medics (18D), SWAT medics, Army medics (68W/98W), Paramedics, Nurses, PAs and Doctors with operational experience. Their credentials are all current and all participate in annual refreshers.

APPROACH

Our approach takes each client through classroom instruction to practical hands-on skill stations which facilitates the learning process. Students are taught the most expedient way to save casualties on the battlefield or in tactical situations. Final training exercise (FTX) packages can be implemented at the customer's request to culminate the training and are customized to meet the client's unique mission.

Add-on packages include, but are not limited to, realistic wounding created by a Certified Moulage Specialist, day and night practicals, day and night LTT scenarios with live fire, simulated machine gun, RPG, mortars, claymores, IEDs, smoke, etc.

We also blend classroom instruction and USDAAT Modalities Training taking each student through a complete immersive training experience.

It is our goal to provide the highest level of services. We pride ourselves in professionalism and integrity providing our clients with the best training available.

CLIENT TESTIMONIALS

"Trauma Training uses the "latest and greatest" tactics, techniques and procedures from combat experience with traumatic medicine downrange. It was great to get exposed to the most current stuff out there and to see what has changed in 3-4 years since I left my team. June 10, 2011

"Excellent and most realistic injuries I've ever seen during training. Best exercise I've ever been involved with. Best learning experience." May 5, 2011 Adrian Michigan First Responder TCCC Training

"Julie's Moulage was excellent! Gave it the realistic factor. The injuries were great to help with the stress." May 5, 2011 Adrian Michigan First Responder TCCC Training

"The realism with the pyrotechnics was outrageous." 11 November 2010

"One of the best training events I have done - great putting TCCC skills with tactical training together - role players were excellent. Well planned and well executed lanes that tested entire knowledge base of TCCC course material. Out of all the military medical training during my time in the Army I have never felt more confident or knowledgeable to treat casualties, which are such a high possibility in our profession." October 20, 2010

"Excellent course! After 10 years of war we have the training right. Thanks for the Instruction." Air Force Pre-Deployment Training October 2010

"Best training I have ever received in 20+ years of service. Professional and Knowledgeable instructors." Air Force Pre-Deployment Training October 2010

"Excellent, Outstanding, Superb training! I feel confident I'm ready to do my job as a CLS in theater. Loved the rotations of instructors... kept the learning environment "entertaining" and varied." Air Force Pre-Deployment Training August 2010

"This was truly an outstanding course. Materials well-chosen and good visual support of demonstrated procedures. Instructors took care to deliver content, comprehension, and monitor progress. They were always on their game." Air Force Pre-Deployment Training August 2010

"I have served for 18 years and the CLS course is by far the best course I have had for medical training/" Air Force Pre-Deployment Training March 2010

"I have been through CLS 4 times previously. The CLS taught by T2 is by far the best training that I have ever received. I feel more confident and prepared to save a life." Air Force Pre-Deployment Training January 2010

"T2 focused on what we need to do to save lives. They really hammered home the priorities of what to look for. Amazing hands-on practical application, from the realistic wounding to the FTX final exercises. All have given me the confidence to perform necessary steps in triage situations. The instructor's enthusiasm and experience, a truly beneficial bonus. Thanks for the amazing training." January 2010

"T2 provided some of the best medical training I have ever received. T2 is leading the industry in combat casualty care." January 2010

"This was by far the best combat trauma class I have ever taken. As close to the real thing as you can get" Black Ops Unit 18 October 2009

"Julie's artistic wounding is a great addition to the training, very realistic when approaching a role player" Black Ops Unit - 18 October 2009

"As we discussed at SOF Academy, I am a MN licensed EMS 1st Responder. MN 1st Responder requires 40 hours of formal classroom training. Without question I learned more and have greater confidence in my ability to react in a medical emergency after 10 hours of your TCCC class than the 40 hours of MN training. The combination of lecture - focusing on what will save lives, and the hands on practical were superb. Thank you for the opportunity to learn." Mr. Garvey 8 June 2009

A week after I completed the TCCC course of instruction I was overseas. My vehicle convoy was hit with an IED. The skills I learned gave me the necessary tools to save a life." Black Ops Unit - February 2009
